Acknowledgements

This work began as a set of notes for a series of Therapeutic Yoga Teacher Training Courses. It took the substantial support of others to bring them into existence.

David is very grateful to Dr. Karandikar, Madam Anagha Bhide and Kabir Baug, the restorative yoga institution in Pune, India, where he has been studying over the last fifteen years. He would like to thank them for the selfless sharing of their vast knowledge. His gratitude also goes to all the staff members at the institute who always went the extra mile to help him learn and make his stay comfortable and meaningful.

Anita would like to thank Sandra Sammartino, her yoga teacher for many years, who taught her to view Yoga in each aspect of life and life as the practicing arena for each limb of Yoga. Much gratitude also to Steven Bryson, endless source of information, exceptional Pilates teacher and trainer (<http://www.bodyworkspilatesstudio.com>) from whom she learned much refined work about breath, core strength and the anatomy of movement.

And as the saying goes "without an audience there ain't no show"... We express our gratitude to Jnanadakani, the founder and director of Yoga Espacio in Mexico City, as well as to her students, who have shown such interest in restorative yoga and for whom these notes were created.

We are grateful to Sandy Ayre who read a very early version of these notes and made useful suggestions and to Erin Michie who carefully revised the final draft of the manuscript. Much recognition goes also to many of our faithful students and friends who have given patiently and generously of their time to be photographed for this project. In particular we would like to thank: Nancy Hong, Rossana Peñaloza, Laura Smith, Ana Marti Pozos, Frida Solis, Silvana Azar, Jnanadakani (Georgina Martinez), Tu McAmmond, Diana Jaramillo, Peter Skirving, Diana Irasem Cruz, Van Nguyen, Kim Nguyen, Merrra Quiala, Eunice Aguilar Sierra, Jero Elbitar, Bob Workman, Diana Eichner, Maria Legorreta Correa, Tim Sims.

Lastly, we wish to thank all the generous people who are constantly putting their professional wisdom on the web making research today far easier than it was when David began this work. Every effort has been made to use appropriate Creative Commons or public domain material indicating the sources. If there have been any omissions, please notify us so that we can correct it as soon as possible.

David McAmmond and Anita Sielecki

In addition, I could not fail to acknowledge the unsung hero whose tireless work of writing and editing have made these notes see the light of day – Anita Sielecki, my special friend and colleague. Her precious time and encouragement are greatly appreciated.

David McAmmond
